

Waterproofing Design Strategies to the New British Standard 8102:2022

Thursday 23rd of June

10:30 - 11:30

Includes an overview of the modern methods available for protecting below ground structures from water, as well as an explanation of the updates to the new 2022 version of the British Standard for waterproofing. We will also cover:

- The different forms of structural waterproofing systems in the market and how to achieve the environmental grades outlined within British Standard 8102:2022
- A focus on how combination waterproofing systems are specified in below-ground structures in order to achieve the desired environment

I would like to attend the event in-person

I would like to attend the event online

I would like to visit the EDGE showroom

EDGE

ECO DESIGN GREEN ENVIRONMENT

146 Marylebone Road, NW1 5PH, London

EDGE is a sustainability-focused design and construction showroom. The first of its kind, EDGE showcases sustainability minded brands and services as an environmental hub, where sustainability conscious suppliers and specifiers can connect.
