Type C Waterproofing

E-C-03 SPECIFICATION SHEET

Internal Waterproofing of Existing Structure

Rev 4.0 - 16 December 2022

BUILD

WALL CONSTRUCTION:

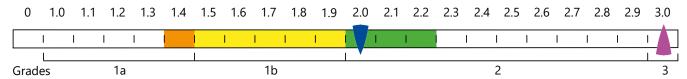

Existing Brick

FLOOR CONSTRUCTION:

EXISTING SLAB

NWI SCALE

Waterproofing solutions can only achieve environmental Grades 1a, 1b or 2. Refer to page 5 of the Newton Design Philosophy

NWI Score when ventilation has not been included.

Ventilation, dehumidification or air conditioning is necessary; appropriate to intended use to achieve Grade 3 - BS 8102:2022.

This specification employs 1 form of waterproofing (Type C - Drained Protection) to provide the desired internal environment is achieved. The effectiveness of the waterproofing is dependent on the Type C system being installed correctly.

SPECIFICATION

TYPE C INSTALLED INTERNALLY

Waterproof internally with <u>Newton CDM System</u> providing drained protection.

NEWTON WATERPROOFING INDEX

The Newton Waterproofing Index (NWI) is a unique scoring system that accurately assesses the level of risk and potential success of specific waterproofing specifications. The NWI score is awarded by a panel of experienced waterproofing design specialists and reflects the chances of success of that specification. The scoring system works in conjunction with the British Standard for waterproofing, which defines the three types of internal environments as Grades 1a, 1b, 2 and 3.

NOTES

To improve the NWI score please see Newton Specification Sheet E-CA-04.

The detailing of other building elements and termination details are available within the Newton Waterproofing specification library.

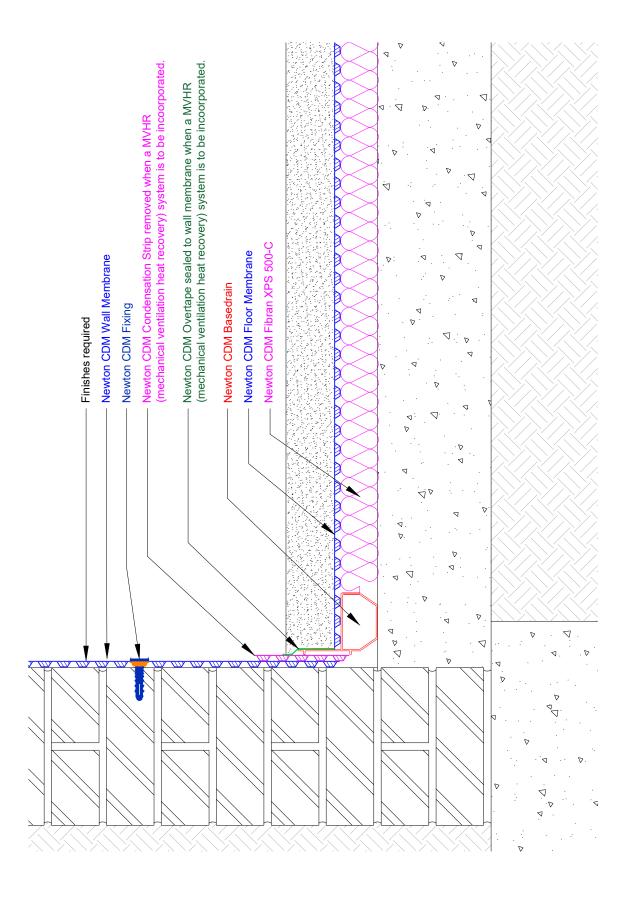

A-RATED INSURANCE

<u>Tailor made insurance policies available depending on the specialist contractor and specification.</u>
